USA Telephone Teams With TeleBlend to Support VoIP Transition for SunRocket Customers

July 20, 2007 -- Broadband phone service provider TeleBlend, one of two “preferred” service providers for former SunRocket customers, announces that USA Telephone (<http://www.savewithusa.com>), a Competitive Local Exchange Carrier (CLEC) providing national Telephone, Internet and Television service, has agreed to support the customer transition by dedicating its extensive resources, management and expertise. TeleBlend is the VOIP business unit of Unified Communications Corp.

“USA Telephone is a nationwide telecom provider with an established track record for delivering reliable TV, telephone and Internet service to customers, and we are tremendously appreciative that they will be working with us to manage a seamless transition for former SunRocket customers,” said Michael Morrison, General Manager for TeleBlend. “USA Telephone President and CEO, Bill Fogg and Vice President of Operations Michael Carbonneau will join me to oversee and guide the process, and to help begin what we hope will be a long-term relationship with tens of thousands of new TeleBlend broadband phone service customers.”

TeleBlend is offering former SunRocket customers a heavily discounted monthly subscription rate of \$12.95 for the duration of their previous annual contract with SunRocket to help ease this transition. With this offering, former SunRocket customers can ensure they have uninterrupted service, and a way to maintain and rapidly transfer their existing phone number.

For more information on TeleBlend’s offer for former SunRocket subscribers, visit <http://myTeleBlend.net/>. USA Telephone recently acquired the CLEC division of MobilePro enabling USA Telephone to extend its services across the entire United States.
